

Chair O Plane Ride Risk Assessment

GENERAL INFORMATION:

Company / organisation:	(Insert company name).	ABN:	(Insert)
Address:	(Insert)	State:	(Insert)
Activity:	Chair O Plane ride / amusement device installation and operation.		
Date developed:	(Insert)	Developed by:	(Insert)
RA approved by:	(Insert)	Date of next review:	(Insert)

REQUIREMENTS:

Person(s) responsible for implementing and monitoring the risk assessment:	(Insert)
Applicable legislation and compliance references:	<p>Work Health and Safety Act 2011 (ACT, NSW, QLD), 2012 (SA, TAS), 2020 (WA)</p> <p>Occupational Health and Safety Act 2004 (VIC)</p> <p>Work Health and Safety (National Uniform Legislation) Act 2011 (NT)</p> <p>Work Health and Safety Regulations 2011 (ACT, QLD), 2012 (SA, TAS), 2017 (NSW), 2022 (WA)</p> <p>Occupational Health and Safety Regulations 2017 (VIC)</p> <p>Work Health and Safety (National Uniform Legislation) Regulations 2011 (NT)</p> <p>Code of Practice – How to manage work health and safety risks</p> <p>Code of Practice – Work health and safety consultation, cooperation and coordination</p> <p>Code of Practice – Managing the risks of plant in the workplace</p> <p>Code of Practice – Amusement devices (QLD)</p> <p>Australian Standard 3533 (series) – Amusement rides and devices</p> <p style="text-align: center;">SAMPLE - INTENTIONALLY FADED</p>
Training and induction requirements:	Staff induction, customer / patron information / instruction and risk assessment briefing.
Plant and equipment requirements:	Plant and equipment fit for purpose, compliant with Australian Standards and compliance certified by an engineer. Transport vehicle, electrical leads and trailers maintained and fit for purpose.
Personal protective equipment requirements:	Personnel involved in the setup and dismantle are required to wear enclosed footwear and gloves as required.
Inspection requirements:	Staff or nominated personnel to inspect general areas and devices to address safety hazards and maintain housekeeping.
Chemicals and safety data sheets:	Oils and lubricants / maintenance consumables.

RISK ASSESSMENT MATRIX:

The risk assessment matrix is used to assess the inherent and residual risk score using the likelihood and consequence risk criteria.

		Consequence				
		1	2	3	4	5
Likelihood		Insignificant No injuries, no environment impact, no reputational impact, negligible financial loss.	Minor First aid treatment, short-term environment impact, minimal reputational impact, minor financial loss.	Moderate Medical treatment or hospitalisation, medium-term environment impact, localised reputational impact, moderate financial loss.	Major Permanent injury, long-term environment impact, loss of operational capability, adverse reputational impact, major financial loss.	Catastrophic Death or irreversible environment effect, national reputation damage, catastrophic financial impact.
5	Almost certain The event is expected to occur in most circumstances	Moderate	Moderate	High	Extreme	Extreme
4	Likely The event will probably occur in most circumstances	Low	Moderate	High	Extreme	Extreme
3	Possible The event should occur at some time	Low	Moderate	Moderate	High	Extreme
2	Unlikely The event could occur sometime	Low	Low	Moderate	Moderate	High
1	Rare The event may occur only in exceptional circumstances	Low	Low	Low	Moderate	Moderate

SAMPLE - INTENTIONALLY FADED

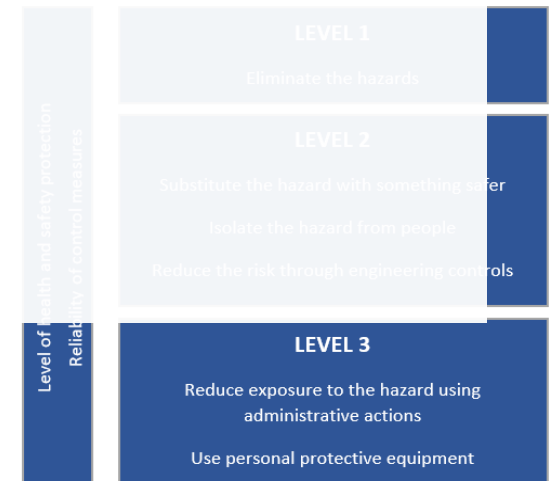

Risk actions including escalation, management and monitoring will be determined by the risk assessment.

Risk Actions	
Risk	Actions
Extreme risk	Immediate senior management actions, planning and robust controls required.
High risk	Management attention, rigorous controls and close monitoring required.
Moderate risk	Management monitoring and controls required.
Low risk	Acceptable with routine procedures and periodic review.

HIERARCHY OF CONTROL

HIGHEST

LOWEST

RISK ASSESSMENT:

Assess the likelihood (L) and consequence (C) of the inherent risk score (before treatment) and residual risk score (after treatments) using the risk assessment matrix.

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
		L	C	Risk		L	C	Risk	
Insurances	Insurances not in place exposing the company to potential or actual direct financial and legal liability for harm or property damage.	L3	C4	High	<ul style="list-style-type: none"> Public liability insurance placed. Workers' compensation insurance placed. Asset / property insurance placed. Other insurances placed as required. 	L1	C4	Moderate	Management
Indemnity	Terms, conditions and restrictions not established or communicated with customers / patrons.	L3	C4	High	<ul style="list-style-type: none"> Terms and conditions established and communicated with customers / patrons. Information and safety signage installed Supervision and management of amusement operational areas and activities. 	L1	C4	Moderate	Management
Working with children	Staff are not checked or do not hold a current working with children / blue card resulting in a child safety exposure or incident.	L3	C3	Moderate	<ul style="list-style-type: none"> All staff required to hold a current working with children check / blue card. Renewal of blue cards when they are approaching expiry date. Staff trained on child safe behaviours, conduct and incident reporting procedures. 	L1	C3	Low	Management
Staff / operator training and competency	Staff not trained on company policies, customer service, safe amusement device operation, compliance and emergency procedures resulting in an incident, injury and or property damage.	L3	C4	High	<p style="text-align: center;">SAMPLE - INTENTIONALLY FADED</p> <ul style="list-style-type: none"> Staff are inducted / trained on policies and procedures including safety, compliance, emergency and customers / patron safety. All staff / operators trained on correct / safe operation of amusement devices and emergency procedures. Annual refresher training is conducted. 	L1	C4	Moderate	Management
First aid and emergency management	Emergency management plan and provisions not established or maintained inhibiting / delaying a response to an emergency situation.	L3	C5	Extreme	<ul style="list-style-type: none"> Amusement device operators trained in first aid (at least one person onsite). First aid kit and injury register available / in close proximity to amusement device. Fire extinguisher with current maintenance tag in close proximity to amusement device. Emergency management and evacuation procedures in place for amusement devices. Staff trained on enacting / implementing emergency and evacuation procedures. Emergency procedures communicated with customers / patrons prior to use of amusement device. Staff regularly tested on enacting emergency drills / procedures. 	L1	C5	Moderate	Management

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)

Contractors and third parties	Contractor and third-party compliance requirements not established or effectively implemented resulting in contractors operating without the required safe systems or works, qualifications or insurance coverage.	L3	C3	Moderate	<ul style="list-style-type: none"> Engagement or reputable providers Certificates of insurance are collected. Risk assessments / documentation are collected and reviewed (for high-risk activities) 	L1	C3	Low	Management
Aggressive behaviour or violence	Staff and or customers / patrons exposed to aggressive or violent behaviour resulting in physical or psychological harm.	L3	C4	High	<ul style="list-style-type: none"> Emergency procedures in place for aggressive / violent behaviour. Staff trained on dealing with aggressive behaviour. Staff to contact the police if there is a threat or act of violence (occupational / domestic). 	L2	C4	Moderate	Management Operators Authorities / police
Manual handling	Poor manual handling practices when loading, unloading, setting up and packing up amusement devices resulting in musculoskeletal injury / soft issue injury.	L3	C3	Moderate	<ul style="list-style-type: none"> Correct training in manual handling Delivery of equipment as close as possible to set up areas (if safe and approved) Operators understand and follow manual handling guidelines. Warm/up stretches and rotation of manual tasks between operators Using mechanical aids when available. Rotating between staff to reduce repetitive 	L2	C3	Moderate	Management Operators
SAMPLE - INTENTIONALLY FADED									
Cleaning and hygiene	<p>Mould, moisture or fluids in, around or on seats resulting in a slip hazard exposure, health hazard exposure or subsequent incident / injury.</p> <p>Using incorrect cleaning agents on ride resulting in corrosion on ride parts.</p>	L3	C3	Moderate	<ul style="list-style-type: none"> Daily cleaning of entire ride Cleaning of any spills, fluids or solid on or surrounding device. Regular monitoring of floor / ride area to ensure no loose objects / fluids or trip hazards. Only using the recommended cleaning products as per manufacturers manual. Staff / operators to ensure ride clean and dry before being packed away. Ride stored appropriately away from weather elements. 	L2	C3	Moderate	Management Staff
Personal protective equipment	<p>Staff / operators not wearing correct PPE during set up / dismantle or operation of ride resulting in injury.</p> <p>Staff / operators exposed to sun / heat and not wearing sun smart PPE resulting in sunburn and or dehydration.</p>	L3	C3	Moderate	<ul style="list-style-type: none"> Management to advise staff / operators of correct / mandatory PPE when inducted. Staff / Operators to wear appropriate PPE at all times including set up / dismantle and operating ride. Sun smart PPE implemented by management including sunscreen, hats and regular hydration. 	L2	C3	Moderate	Management Operators

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
		L	C	Risk		L	C	Risk	
Amusement device compliance	Mechanical amusement device non-compliance with Australian Standards resulting in asset defect or failure, customer / patron injury / death and or voidance of insurance.	L3	C4	High	<ul style="list-style-type: none"> Manufacturing and testing in accordance with Australian Standard 2553 (series) – Amusement rides and devices. Certificates of conformity obtained from manufacturer. Annual registration with Regulator and engineering inspection / conformance verification certificate. 	L1	C4	Moderate	Management
Maintenance	Mechanical amusement device not adequately inspected or maintained resulting in critical failure and serious injury / death to a customer / patron and or property damage.	L3	C4	High	<p style="text-align: center;">SAMPLE - INTENTIONALLY FADED</p> <ul style="list-style-type: none"> Daily inspections completed by staff / operators prior to customer / patron use. Post-setup inspection and safety checks prior to allowing use (following the device inspection checklist / MFG instructions). Regular inspection, lubrication and maintenance of main bearings and components. Regular maintenance inspection by a competent engineer. Major inspections and NDT completed in accordance with manufacturer and Australian Standards requirements. Routine maintenance in accordance with manufacturers manual and maintenance schedule. Routine and corrective maintenance where issues, damage and defects are identified. Prevention of any unsafe or damaged amusement device from being used. Regular completion of logbook and maintenance records in accordance with maintenance schedule / MFG manual. Electrical inspection / test and tag of portable electrical equipment and RCD for mains. Hydraulics set up as per manufactures manual are inspected daily / maintained as per manufactures manual. 	L1	C4	Moderate	Management

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
		L	C	Risk		L	C	Risk	
Transporting amusement device	Motor vehicle accident, amusement device not secured correctly or signed if parts hanging off trailer resulting in serious road incident, property damage and or fines.	L3	C4	High	<ul style="list-style-type: none"> Operator has a current and appropriate drivers licence and is confident travelling with a trailer / towing device. Transport vehicle and trailer is registered and regularly maintained / road worthy. All amusement equipment is securely fixed to the vehicle and or trailer. Appropriate signage is on the vehicle or trailer (if oversize / overhang). Inspect location conditions prior to driving to the set up areas to avoid incorrect setup of vehicle / trailer becoming bogged or contacting structures and fixed assets. Driver completed operational / visual checks on car / trailer prior to travelling. Long distance procedures in place to ensure driver stopping / resting at adequate intervals. 	L1	C4	Moderate	Management Operator
SAMPLE - INTENTIONALLY FADED									
Site arrival / departure	<p>Vehicles / trucks / trailers operating at site when pedestrian traffic is high resulting in collision with operators and or public.</p> <p>Vehicles / trucks / trailers entering site at high speed, no hazard lights on or unsure where to drive / park resulting in pedestrian injury and or property damage.</p>	L3	C4	High	<ul style="list-style-type: none"> Installation location confirmed with client and inspected for safety hazards. Set ride delivery and departure times are arranged by client to ensure pedestrian activity is minimal. Site roads inspected to ensure no hazards / obstacles on road / site location. Staff to monitor pedestrian movement while trucks are moving and guide pedestrians away from trucks path. Driver to maintain a very low speed. Hazard lights / safety lights and or reversing beepers operating when vehicle in site area. Spotters used when reversing or when line of sight is compromised. 	L1	C4	Moderate	Management Operator

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
		L	C	Risk		L	C	Risk	
Set up of amusement device	<p>Mechanical amusement device not installed or secured correctly resulting in a serious injury / death to a customer / patron and or property damage.</p> <p>Staff / operator installer fall from heights during setup resulting in serious injury / death and or property damage.</p>				<p>Staff trained and competent to install amusement device safely.</p> <ul style="list-style-type: none"> Installation location confirmed with client and inspected for safety hazards. Underground services / locations identified with customer or dial before your dig. Fixed asset, overhead hazards and terrain hazards identified, installation location must be away from asset / overhead hazards and on a flat and stable surface / ground. Fit for purpose working at heights equipment used including fall restraint devices / arrest harness and ladders and staff trained to use. Anchorage / stabilising / outrigger systems installed in accordance with MFG manual and Australian Standards ensuring the device is properly secured / stable and levels checked. Appropriate blocking and strapping equipment to stabilise / distribute weight evenly Constant checks of jacks / stabilizer legs during operation to ensure trailer / ride is stable. Access equipment, guarding and rails installed to provide safe access to the device and prevent access to moving parts. Operational controls and electrical installations secure / restricted access and trip hazards eliminated using cable covers and or barriers. Barriers / Fencing erected prior to set up of amusement to ensure unauthorised access. Staff to ensure all shielding is installed / secure on all mechanical / exposed areas. Clear / restricted zones established for staff when setting up amusement. Hydraulics set up / inspected / maintained daily as per manufactures guidelines. Generators set up /inspected / maintained as per manufactures guidelines. Site manager / supervisor on site at all times. 	L1	C4	Moderate	<p>Management</p> <p>Operator</p>

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
		L	C	Risk		L	C	Risk	
Emergency stop button	Emergency stop button not labelled, not in an accessible location resulting in a delayed device cessation in the event of an emergency or issue.	L3	C4	High	<ul style="list-style-type: none"> Emergency stop buttons are installed on all mechanical amusement devices. Emergency stop buttons are labelled, clearly visible and tested on a daily basis as a part of the pre-operation inspection process. Staff / operators are trained on the use of emergency stop buttons and maintain clear access at all times. Staff / operators to remain at the control console and emergency stop button at all times during device operations. 	L1	C4	Moderate	Management Operator
Fire extinguisher	Fire extinguisher not installed, operator does not know how to operate a fire extinguisher, fire extinguisher is not compatible with emergency resulting in serious injury and or property damage.	L3	C3	Moderate	<ul style="list-style-type: none"> Fire extinguisher are installed next to the ride / easy to access area. Operators are trained and confident in operating a fire extinguisher. The appropriate fire extinguisher is on site class ABE (fire extinguisher red with white band) are designed for most fires except oils. All systems and surfaces to be maintained / kept clean to avoid sources of ignition. 	L1	C3	Low	Management Operator
Electrical equipment and power	Electrical equipment not fit for purpose, damaged and or not maintained resulting in electric shock, power failure and or property damage.	L3	C3	Moderate	<p style="text-align: center;">SAMPLE - INTENTIONALLY FADED</p> <ul style="list-style-type: none"> All electrical systems and equipment to be inspected and confirmed fit for purpose. Electrical leads and equipment inspected, tested and tagged by a competent person in the required frequencies. Mains power protected by RCD and RCD tested at the required frequencies. Minimum distance between power and ride Electrical leads are covered with a lead mat if necessary. Ride is shut down and locked when not in operation. 	L1	C3	Low	Management Operator
Flammable liquids	Flammable liquids not stored correctly resulting in fire, explosion, operator / bystander injury and or death.	L3	C4	High	<ul style="list-style-type: none"> Fuel is stored in appropriate container and correctly labelled. Fuel is stored in a cool, safe, and secured area away from ignition sources and public. Appropriate minimum amount of fuel stored onsite for day use and additional fuel quantities stored off site. All fuel / liquids are stored in bunding. Spill kit near onsite and off-site locations. Only trained staff to re-fuel. Substance release pathways identified and protected including ground, drains, slopes. <ul style="list-style-type: none"> Generator to be turned off for a minimum of 10 minutes prior to refuelling. Minimum two trained staff when refuelling. 	L1	C4	Moderate	Management Operator

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
		L	C	Risk		L	C	Risk	
Hydraulics	<p>Hydraulic oil leakage resulting in operator / patron fall on slippery surface.</p> <p>Hydraulic failure during lowering / raising trailer resulting in crush points to operator.</p> <p>Hydraulic pump failure or hose bursts resulting in mechanical failure of ride and shut down.</p>	L3	C4	Moderate	<ul style="list-style-type: none"> Regular inspections of hydraulics and oil level as per daily pre-opening checklists and maintenance / annual inspections. PPE required when filling oil Staff are trained in using the hydraulic to lower / lift trailer Safe perimeter around trailer is established when lowering / raising hydraulics. Hydraulics are turned off when not required / in use Hydraulic system fitted for purpose to ensure no oversize or over pressure of the system can cause over speed bypass valves and routinely checked. Operators to ensure hose is not obstructed Daily checks on hydraulics / pump / hose daily with pre-opening checks and throughout the day Barriers and signage installed to ensure no unauthorised patrons enter. Regular inspection of hydraulic control system. 	L1	C3	Low	<p>Management</p> <p>Operator</p>
SAMPLE - INTENTIONALLY FADED									
Operator / attendants of amusement	<p>Prolonged static postures maintained for long periods of time resulting in injury to operator.</p> <p>Fatigue of operator due to not having adequate breaks, becomes tired and not focused on ride safety putting patrons at risk / property damage.</p> <p>Operator standing under ride and hit by seats / patrons resulting in injury.</p>	L3	C3	Moderate	<ul style="list-style-type: none"> Management to ensure operators / attendants have regular breaks. Ride rotation among staff to reduce repetitive movements and fatigue levels. Shift work / rotating roster to ensure adequate breaks in busy periods. Operators to report any fatigue / safety issues to management. Noise / Vibrations routinely tested to ensure in line with standards. Staff / Operators remain off impact / ride area / seats and behind barrier when ride is in operation. 	L1	C3	Moderate	<p>Management</p> <p>Operator</p>
Crowd Control / Security	<p>Maximum number of customers / patrons exceeded on device resulting in over crowding and or serious injury.</p> <p>Patrons intoxicated or misbehaving.</p> <p>Ride tampered with / stolen when left unattended / carnival closed.</p>	L3	C3	Moderate	<ul style="list-style-type: none"> Staff / operator to load number of customers / patrons on the device as per manufactures requirements ensuring maximum numbers on ride is not exceeded. Barriers to ride and queue areas clearly marked and secure. Where possible installation of CCTV cameras covering ticketing box / line up and device. Patron's mis behaving / intoxicated will not be able to participate in the ride and ask to leave the ride area. Staff instructed to call security if required. 	L1	C3	Low	<p>Management</p> <p>Staff / operator</p>

Activity / Focus Areas: (break down the activities)	Risks: (what could happen or go wrong)	Inherent Risk: (what is the risk before controls)			Risk Treatments and Controls: (how are the risks managed)	Residual Risk: (what is the risk after controls)			Responsibility: (who is responsible)
